PROFESSIONAL SUMMARY

Flutter & Frontend Developer with hands-on experience building responsive web and mobile applications using Flutter, React, Next.js, TypeScript, and JavaScript. Experienced in integrating REST APIs, implementing authentication and role-based access, debugging applications, and building payment-enabled applications using M-PESA Daraja API. Built and deployed web and mobile projects involving e-commerce, event booking, dashboards, and API integrations. Comfortable working with Git, collaborative development workflows, and learning new technologies quickly.

MY SKILLS

- **Frontend & Mobile:** Flutter, Dart, React, Next.js, TypeScript, JavaScript, Tailwind CSS, HTML5, CSS3
- **API & Backend:** Node.js, Express.js, REST APIs
- **Databases:** Firebase, MongoDB, MySQL
- **Tools:** Git, GitHub, Docker (basic), CI/CD basics
- **Payments:** M-PESA Daraja API
- **Additional:** Laravel, PHP

PROFESSIONAL EXPERIENCE

Frontend Engineer Intern

INFNOVA Technologies, Remote | Addis Ababa, Ethiopia

March 2026 to July 2026

Key Contributions

- Built React and Next.js interfaces and dashboards for student onboarding, learning management, and mentor-student collaboration.
- Worked with backend developers to integrate REST APIs and connect API data with TypeScript interfaces across the application.
- Implemented JWT authentication, protected routes, and role-based access control to manage access to different parts of the platform.
- Used Zustand for application state management and Zod for validating data received through forms and APIs.
- Took part in code reviews and followed the team's coding standards and project structure.
- Fixed bugs, investigated issues, and made improvements while working on new features.
- Created technical documentation covering the application structure, components, and development workflow to help other developers understand the codebase.
- Built responsive interfaces that worked across desktop, tablet, and mobile devices.

Full-Stack Developer Intern

Future Interns, Remote

February 2026 to March 2026

Key Contributions

- Developed and deployed full-stack applications using React, Node.js, Express, and MongoDB.
- Built responsive WordPress and PHP websites with a focus on functionality, accessibility, and user experience.
- Managed projects across frontend and backend environments from development through deployment.
- Created technical documentation and project guides that improved communication with non-technical stakeholders.

PROJECTS

E-commerce mobile app, Dart/Flutter

Flutter, Dart, Node.js, Firebase, Cloudinary, M-PESA Daraja API

- Built a mobile e-commerce application with separate **admin and client roles**.
- Clients can browse products, add items to their cart, place orders, and make payments through **MPESA**, with payment prompts sent directly to their phones.
- Built an admin section where administrators can **add, update, and delete products**.
- Used **Firebase** to manage application data and **Cloudinary** to store product images.
- Developed the backend with **Node.js** and integrated the **M-PESA Daraja API** to handle payments.

GitHub: https://github.com/Stella-wach/Go-Cart_Flutter

Event Management App with M-PESA Integration

React, Node.js, Express, MongoDB, Inngest, Clerk, REST APIs, M-PESA Daraja API

- Built a full-stack event booking platform with separate **admin and user access**, where admins manage events and users can browse, save, book, and pay for events.
- Built an event scheduling feature that lets admins add **multiple dates and time slots to the same event**, making it easier to manage recurring events.
- Integrated **Clerk** for authentication and **Inngest** to handle user events and keep user information in sync with the backend.
- Built the booking interface and user flow allowing customers to browse events, reserve tickets, and complete payments through M-PESA STK Push.
- Developed REST APIs with Node.js and Express for managing events, bookings, favorites, users, and payments, with MongoDB storing the application data.

GitHub: <https://github.com/Stella-wach/Event-Project.git>

SavanaCRM, Lead Management System

React, Node.js, Express, MongoDB, JWT, Recharts

- Built a full-stack CRM with lead-management workflows, analytics dashboards, and role-based access control.
- Designed REST APIs and database structures using Node.js, Express, and MongoDB.
- Implemented JWT authentication and user management features.
- Added reporting, search, and filtering features to support day-to-day business operations.

EDUCATION

Diploma in Software Development

Institute of Software Technologies, Nairobi, 2024 to 2026

BA in Sociology and Communications

University of Nairobi, 2020 to 2024
