Rodgers Odari
Manager & Software Developer,
Institute of Software Technologies

Profile

I'm a full-stack developer who loves taking a product from a blank canvas all the way to a live, working application. My work spans database design, RESTful API development, responsive front-end interfaces, and real-world integrations like M-PESA STK push payments in production environments.

A background in Sociology & Communications sharpens how I think about users, collaborate across teams, and translate technical decisions to non-technical stakeholders. I thrive when given end-to-end ownership.

Experience

Frontend Developer
Remote

INFNOVA Technologies • Addis Ababa, Ethiopia

INFNOVA delivers digital solutions across East Africa. I led frontend development for an educational academy platform expanding digital learning access throughout Ethiopia.

- Built core features enabling learners to access resources, interact with mentors, and message peers in real time.
- Developed scalable React.js & TypeScript components with responsive Tailwind CSS layouts across devices.
- Collaborated with product and backend teams to ship polished, production-ready interfaces.

Full-Stack Developer Intern
Remote • Internship

Future-Interns

Gained hands-on full-stack experience designing and shipping web applications across the entire stack.

- Built dynamic UIs with React.js, backend APIs with Node.js, and managed data using MongoDB.
- Worked with WordPress, PHP, and MySQL for content-driven websites.
- Delivered features independently from scoping through to deployment.

Selected Projects

Developer Portfolio
Solo • Full-Stack • Live

- Animated portfolio with JWT-authenticated admin panel to manage projects without touching the codebase.
- Contact form with MongoDB storage; dark/light mode, category filtering, CV download.

Tech: React.js, Vite, Tailwind CSS, Framer Motion, Node.js, Express.js, MongoDB, JWT

SavanaCRM - Lead Management System
Solo • MERN Stack

- Production CRM with 5-stage sales pipeline, analytics dashboard (Recharts), and CSV export.
- Full REST API with JWT auth, bcrypt hashing, and public contact endpoint for website integration.
- Paginated lead table with real-time search, multi-filter support, and inline status updates.

Tech: React.js, Vite, Recharts, Node.js, Express.js, MongoDB, Mongoose, JWT, bcryptjs
github.com/Stella-wach/FUTURE_FS_02

Event Management App
Solo • 1 month

- Secure auth with admin/guest roles; full RESTful API for event creation and management.
- Integrated M-PESA STK push, navigating real-time async callbacks as the core technical challenge.

Tech: React.js, Node.js, Express.js, MongoDB, M-PESA API
